

Sulakshana “Sue” Sundaresan, DDS

**General Dentist, Adult & Cosmetic Dentistry,
Certified Invisalign® Provider**

“As a teenager, I had orthodontic treatment and was amazed at the transformation. I always knew I wanted to be in the healthcare field, and this experience pushed me towards dentistry. The idea of transforming people’s perceptions about themselves and their mouths was compelling to me, as was creating healthy mouth-body connections.

Once I started practicing, I realized that dental anxiety is a barrier to appropriate treatment. With the introduction of innovative technology like the Solea Laser and Itero Scanning, we can give our patients a zero anxiety visit to restore their oral health with confidence. It is also special when a patient tells me how much they love being photographed with their new smile at the completion of cosmetic procedures.

Patient education is an important part of all our appointments as I firmly believe that an informed patient is a healthier patient. Prevention and routine care are core values, we as an office try to impart to our patient families.

My goal is to give our patients optimal care by means of quality work, empathy and education in order to empower them to take responsibility for their well being.”

On a personal level, Dr. Sue enjoys spending time with her family, reading and traveling.

DDS

Advanced Standing Program,
New York University,
New York, NY

Internship

One-year rotation in all branches
of dentistry, Manipal Institute of
Higher Education, India

BDS
